

## COMMERCIAL TRANSPORT

November 16, 2011

To Whom It May Concern:

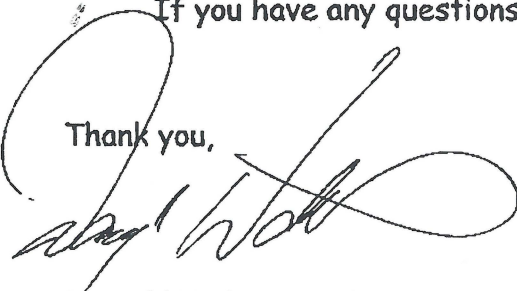

We at Commercial Transport (Northern) Ltd. have been a customer of Bedard Tankers for last 35 years, over this time we have purchased pneumatic trailers to haul cement, flyash, slag, fine lime, coarse lime and various other products.

The Lime products we hauled especially coarse lime was 1" to 1 ½" in diameter, we have always used a 1 bar system (14.7 psi) and had no problem unloading this material the key is having an 8" product valve for coarse material.

I have had an opportunity to unload all of these products, and **we feel Bedard has one of the best tank products on the market bar none**, we have had a great relationship with Bedard over the years and will continue to use there product in the future.

If you have any questions, please feel free to call me.

Thank you,

Darryl Watkins  
Fleet Maintenance Manager
